

Shell Street Enhancement

The Public Works Department, in cooperation with the Community Redevelopment Agency, is undertaking an enhancement project at the intersection of Shell Street and Palmetto Avenue.

The enhancement will incorporate a decorative wall with a variety of plantings that will include, green and silver buttonwood, coco plum, cord grass, sea oats, european fan palms and indian hawthorne. These plants were chosen because of their tolerance to the salt and wind environment.

This project is part of the CRA's continuing effort to update and beautify the beach accesses throughout the City.

If you have any questions about this or any other Public Works project, you may contact them at 777-2309.
